Status							
1)⊠	Responsive to communication(s) filed on 20 November 2003.						
2a)□	This action is FINAL. 2b)⊠ This action is non-final.						
3)□	3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is						
	closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposit	ion of Claims						
4) 🖂	Claim(s) <u>1-21</u> is/are pending in the application.						
	4a) Of the above claim(s) is/are withdrawn from consideration. ☐ Claim(s) is/are allowed. ☐ Claim(s) <u>1-5,10-12,14-18 and 21</u> is/are rejected.						
5) <u> </u>							
_	Claim(s) <u>6-9,13 and 18-20</u> is/are objected to.						
8)[8) Claim(s) are subject to restriction and/or election requirement.						
Applicati	ion Papers						
9)☐ The specification is objected to by the Examiner.							
10)	10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.						
	Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).							
11)[The oath or declaration is objected to by the Ex	caminer. Note the attached Office	Action or form PTO-152.				
Priority ι	ınder 35 U.S.C. § 119						
 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) ☐ All b) ☐ Some * c) ☐ None of: 1. ☐ Certified copies of the priority documents have been received. 							
2. Certified copies of the priority documents have been received in Application No

Art Unit: 2826

DETAILED ACTION

Allowable Subject Matter

- 1. Claims 6-9, 13 and 18-20 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- The following is a statement of reasons for the indication of allowable subject matter:

 Prior art failed to establish the required nucleation layer and the required finger shaped protrusions.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-5, 10-12, 14-18 and 21 rejected under 35 U.S.C. 103(a) as being unpatentable over Onishi (2003/0146444) in view of Ando (6,429,467) further in view of Ishikawa et al. (5,977,565).

Regarding Claims 1-5, 10-12, 14-18 and 21, Onishi discloses a group III-V compound semiconductor and group III-V compound semiconductor device using the same where in Fig. 19, and claims 10, 13, 15 and 16, it is disclosed a first GaN-based semiconductor layer with striped shaped protrusion and a GaN-based buffer layer that is provided at a foot of the protrusion and on the side surface of the protrusion, first contact layer formed on the second semiconductor layer and a second contact layer formed on the

Application/Control Number: 10/707,084

Art Unit: 2826

first contact layer. Onishi fails to disclose the required formula for the semiconductor layer and the required electrode structure. However, Ando discloses a heterojunction field effect transistor where in claims 2 and 3 the required formula is disclosed. Furthermore, Ishikawa et al. disclose a semiconductor light emitting diode having capacitor where in Fig. 5 and claims 1 and 5, the required electrode configuration is disclosed.

Page 3

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required formula and the required electrode configuration in Onishi as taught by Ando and Ishikawa et al. respectively, in order to have a GaN based semiconductor light emitting device with higher performance.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fazli Erdem whose telephone number is (571) 272-1914. The examiner can normally be reached on M - F 8:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn can be reached on (571) 272-1915. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
